Last Post : CIO of PT Indosat

Degree Qualification : Diplomingenieur (Dipl.-Ing.) in Electrical Engineering
(Master Degree) specialised in Telecommunication,
graduated from Technical University of Braunschweig,
Germany

PROFILE

As CIO of PT Indosat, the second largest telecommunication operator in Indonesia since February 2015 and earlier as the Acting CTO, leading the IT Organisation and Network in Indosat. 500+ employees are managed in the planning, building, development operating and optimising Indosat network and IT system since May 2014.

Functioning as the Senior Technical Advisor to the CEO in Indosat since January 2013 to assist the CEO addressing technology and new business. Leading Mobile Financial Project as a part of Financial Inclusion Project from the Bank Indonesia, Leading Expansion to outside Java Program under 'Market Byte Size' Project to further grow the company.

Appointed as Commissioner in PT. Lintasarta and Artajasa, a subsidiary of Indosat's to grow enterprise and the Financial Switching Business further and enhance the synergy with Indosat e-money business.

Exposure to various new digital adjacent businesses to Telco has been gathered during the assignment as the Board and Commissioner since 2008 and later as Board of Director in PT Telkom Metra, a holding company owned by PT Telkom Indonesia. 7 operating companies are managed and supervised by PT Telkom Metra, which are Finnet, Sigma, Infomedia, MetraNet, Melon, Admedika and Telkmovision.

Serving as one of the 5 executive board members (Director Planning and Development) which was also functioning as CIO and CTO in Telkomsel since January 2009 until May 2012. The company revenue has been growing at 31% (around 1.3Bio USD) to 49T IDR (5Bio+ USD) with 64% subscriber growth to 107 Mio subscribers (number 7 in the world) by end of year 2011.

Besides the role as BoD, the responsibility as a member of senior management team is also leading the Engineering, Development, Implementation and Operation team

in the Network and IT as well as leading the strategic Business and Technology Planning, as company's Head of Regulatory and Head of company's Procurement to manage the procurement of all Telkomsel investment and Opex of over 2 Bio USD yearly.

A significant achievement as CIO was to be the first time in the world to successfully migrate 100 Mio prepaid subscribers smoothly to the new Charging platform within 15 months and with a very limited network disturbance in order to lead a very complex IT transformation program smoothly.

Another achievement was in the regulatory aspect, to lobby various government related bodies (included MoF office) to grant the conversion of Frequency License to be based on Spectrum which lead to company's financial saving of 200 Mio USD.

Previous role as the VP Business Control has strengthened the financial skill in reading and analyzing company financial performance. Functioning as Head of Investor Relation, the task was also in assisting and representing Telkomsel Board of Directors supporting both globally listed shareholders (PT. Telkom Indonesia and Singtel) interacting with the investor community in the various Roadshows.

20-over years strong engineering and technical experiences in the IT and network planning, deployment, audit, optimization and operation in some ASEAN countries, both in vendor as well as operator side.

In summary, the combination of setting up right strategy, multi-skills and various experiences in the network, project management, together with the IT and financial knowledge gives a very solid capability in leading and directing any corporate company in various sectors.

AWARDS/ACKNOWLEDGEMENT
